<b>Industrial Rate (\$ / Thousand Gallons)</b>	\$7.42	\$7.72	\$8.03	\$8.35	\$8.68
<p>Industrial monthly charges shall be based on the calculated volume of discharge from each industrial customer, multiplied by the cost per thousand gallons shown above to process the discharge. In the event industrial discharge is more concentrated in Biochemical Oxygen Demand (BOD) or Total Suspended Solids (TSS), causing the system concentration averages to increase, monthly charges may be increased in proportion to the concentrations.</p>					
<p>Note: The basis for establishing equitable sewer rates is the cost to collect and treat wastewater applied to a customer in proportion to a customer's volumes discharged. At the request of a customer, or if necessary because a rate does not exist, an equitable rate may be calculated by the District Engineer. Calculations shall be available for customer review and all calculated rates other than Industrial Rates must be approved by the Biola CSD Board.</p>
