Randy, please this is what I remember: " approval was given by me to fix the one that needed immediate repairs & costs." Thank you for "time and materials" basis...can we have an estimate of cost? The other two projects were to be listed in priority order along with their respective costs as BCSD doesn't have funds for infrastructure repairs/replacements. Staff was going to use Tammy's spreadsheet, can that one be updated to speed things up?

All of this is necessary as it will be on the February 16, meeting agenda for Board approval and it's been long in waiting...thank you for your patience. Your area is not the only one that lacked prior attention and now falls on current staff.

Again, thanks,
Cruz

Hi Cruz,

As per our discussion earlier this morning, I am confirming the verbal approval for the temporary repair of the levee damage caused by the squirrels and storms. We had a quote from a contractor early last year to do the work for about **\$44,000 for just the one levee**. There are now three levees that are damaged. We plan on removing the damaged levees down to the pond bottom elevation and angling back the banks to help prevent further damage and costlier future repairs. We will do this work on a time and material basis and expect to be able to get it done in under 2 weeks, weather dependent.
